MEMORANDUM FOR: Executive Director-Comptroller

SUBJECT : Information Science Center

- 1. The attached memorandum to the Deputy Director, Defense intelligence Agency has been prepared in accordance with understandings reached during and subsequent to the meeting in your office on 14 February.
- 2. Gurrent indications are that NSA will furnish one faculty member and that DIA will carry one faculty member until next fail when he retires. We now have two DD/S&T employees assigned to the Center as instructors and DD/S&T has agreed to let them remain as now assigned. The Office of Training is providing a case officer who will set up the school and direct it during its formative stages. Until permanent arrangements can be made I will provide for two clerical employees from within the Support Directorate's present contract ceiling. This arrangement should permit us to get started immediately with seven personnel against an established total requirement of eight.
- 3. We will need no additional FY 72 funds. We project a maximum FY 73 requirement of \$100,000 \$200,000.
- 4. After some revision, we expect to continue the existing two basic courses for Agency and Intelligence Community personnel. Development of a new course concerned with Indications and Warnings should start soon after our takeover of the facilities. Following this we will examine internal CIA requirements looking toward development of a CIA training capability in FY 74 on CIA property for Agency students and possibly for a few other Intelligence Community students.
